BOOKS FOR THE FAMILY WITH A NEW BABY

A baby will make love stronger, days shorter,
nights longer, bankroll smaller, home happier,
clothes shabbier, the past forgotten,
and the future worth living for.

REMEMBER

Step 1

Select an appropriate book. Books that are small, durable and tactile are good choices for babies.

Step 2

Select books with images and activities that are familiar and enjoyable to your baby. If your baby likes playing with cats, then get a book about cats. Also, babies are learning about their body parts, so books about body parts are a good choice.

Step 3

Assist your baby as they attempt to explore their book through touch. Learning through multiple senses is far more powerful than learning through one sense.

Step 4

Follow your baby's lead by watching their eyes. Your baby's gaze will tell you what is most interesting to them.

Step 5

Vary the pitch, speed and volume of your voice while you are reading. This will keep your baby engaged and interested.

Step 6

Integrate your baby's life into the story you are reading. If it is a story about a cat you can say, "See, this cat is like your cat, Charlie." This makes reading more personal and valuable to babies.

Step 7

Question your baby about things in the story. If you see a cow, ask your baby what sound the cow makes. Then tell the baby that a cow says "moo." You are preparing your baby for eventually responding to you when you ask a question.
